

THE JUDGMENT PLATFORM FOR REGULATED ENTERPRISES

We sell speed.

One press opens a live audio huddle with your management team, 24/7/365. Wisdom twins trained on decades of executive judgment move the decision forward in minutes, with a full audit trail.

PROBLEM

Companies don't lose documents when people leave.
They lose judgment.

10,000

Americans turn 65 every day. The judgment walks out with them.

US Census

Policies record **what** was decided. Never **why**. The principles, exceptions, thresholds, and escalation rules live in heads.

PROBLEM

Decisions that should take minutes wait days.

275

interruptions per employee per
day

Microsoft Work Trend Index 2025

57%

of the workday spent
communicating about work, not
doing it

Microsoft Work Trend Index 2023

Regulated teams cannot paste
consequential work into a public
chatbot. So the meeting stays
the bottleneck.

MISSION

Expand human working memory from 7 items to 1 million.

7 → 1M

items in working memory, per role, with a wisdom twin holding a million-token context of that role's decisions

40h → 120h

of executive judgment available per week.
The 9-to-5 bottleneck opens to 24/7.

NO MEETINGS.

Your twin attends so you don't have to.

Salesforce said **NO SOFTWARE** and created SaaS. We say **NO MEETINGS** and create asynchronous management.

Models run 24/7. Leadership still runs 9-to-5.

CURVE 01

Models reason over decades

Temporal, conditional, contested judgment is now computable. Not chunk retrieval.

CURVE 02

Regulators accept the pattern

Explainability + human override + audit trail is now a recognized governance model.

CURVE 03

Private inference is practical

On-prem and air-gapped deployment, model-agnostic. Sovereign-ready.

Three curves crossed. The gap between model speed and leadership latency is the opportunity.

One press moves the decision forward.

01 · VISCERAL PROOF

One-Press Huddle

Live audio huddle with your management team, 24/7/365. No links. No calendar lag.

02 · CALLABLE JUDGMENT

Wisdom Twin

Role-specific judgment, not a cloned person. Trained on 10-20 years of that role's calls, docs, and decisions.

03 · WHY REGULATORS SAY YES

Trust Layer

Cited evidence, policy gates, named human sign-off, safe decline, full audit. Private VPC, on-prem, air-gapped.

The Sales Director can't attend. His twin does.

1

CEO presses once. A 60-page government RFP is due this week. No proposal team available.

2

The twin joins instantly. Trained on 20 years of RFPs, compliance calls, and email.

3

With citations: "We can do this. I can win this, this week." Policy-gated. Transcribed. Audited.

WATCH IT: [WISDOMTWIN.AI/DEMO](https://wisdomtwin.ai/demo)

1-4 MINUTE AUDIO HUDDLES

Governance is not a feature. It is the product.

Cited evidence

Every answer traces to authorized sources.

Policy checks

Gated against policy version and approval state.

Named validation

A human expert signs off. Accountability has a name.

Confidence decomposition

The reasoning behind the confidence, not one score.

Safe decline

Unsupported judgment? "I will get the human."

Source-level permissions

Access follows the evidence, not the model.

ENFORCED IN CODE

Deterministic enforcement outside the model. The model cannot self-approve a restricted action. Private cloud · On-prem · Air-gapped · Model-agnostic.

Everyone else retrieves. We govern judgment.

Capability	MS Copilot	ServiceNow	Palantir / Glean	WisdomTwin
Captures why a decision was made, not just what	NO	NO	PARTIAL	YES
Policy and permissions enforced outside the model	PROMPT	WORKFLOW	CUSTOM CODE	CODE
Attends the meeting instead of a human, with cited judgment	Summarizes	Routes	Analyzes	ATTENDS + GOVERNS

Everyone sells async communication. We sell async decisioning.

Async comms tools

Loom, Twist, Yac, Slack clips. They cut meetings. They don't make decisions.

WisdomTwin — alone here

Async decisioning as SaaS. Twins join a 2 AM huddle with audit trails, named validation, human override. Air-gapped deployable.

Creator & industrial twins

Siemens, NVIDIA, Dassault. Factories, cities, supply chains. Zero leadership decision authority.

Internal exec-twin experiments

Uber "Dara AI", Toyota "AI Akio", Simile (\$200M), Viven (\$35M). Locked inside. Not for sale.

Nobody owns async decisions. That quadrant is ours.

Skype proved video calls. Zoom killed friction and owned the category.

← ASYNC COMMUNICATION

ASYNC DECISIONING →

Every governed decision makes the twin smarter and the company faster.

A competitor can ship the interface in a quarter. **They cannot ship years of validated judgment.** The moat is the customer-specific evaluation dataset plus the governance runtime.

\$8-12B serviceable today.
\$50B+ as retirements peak.

20-30k **× ~\$300k** **= \$8-12B**

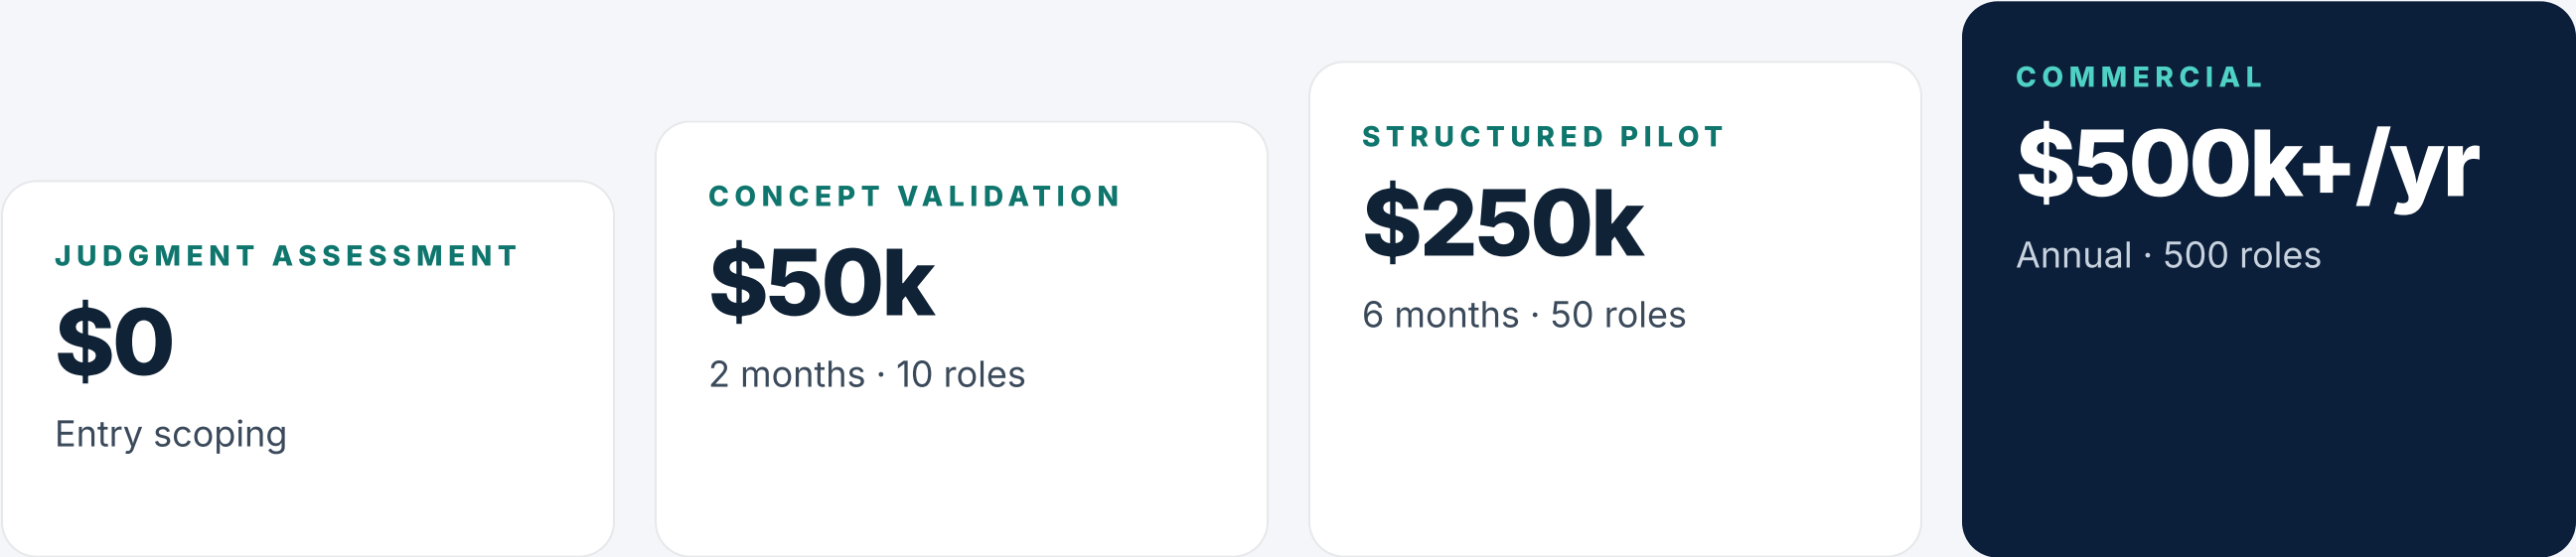

mid-market and enterprise firms with
10+ executive roles, regulated bias,
NA + EU

average ARR on the locked ladder:
\$250k pilot to \$500k+/yr commercial

2026 serviceable market. Regulated
sectors pay 2-3x for governance.

Beachhead: Toronto, the densest concentration of regulated buyers and AI
talent in North America. Expansion: **MENA via Dubai**.

One price per stage. One unit: the role.

No tokens. No meters. You pay for judgment capacity deployed, never per question asked.

Working demos. Pre-revenue. Stated plainly.

CLIENT OUTCOME

We used our own twin to win a government RFP for Talent Lab. Its CEO said on our podcast the win generated **\$5.5M** in 2025 revenue for her company. Client revenue, on the record. Never presented as product revenue.

Roman builds the twin. Stella makes it deployable.

Roman Bodnarchuk

Co-Founder & CEO · SF-Toronto · full-time, writes the code

28 years turning executive judgment into systems. Founded N5R in 1998; P&G digital agency of record for 6 years; scale-up operator across 15 countries.

Personally built every WisdomTwin demo end to end. Leads product, fundraising, and founder-led sales.

Stella Cabrera

Co-Founder, Governance & Institutional Trust · Dubai-Toronto

20+ years with banks, fintechs, and regulators. Chairman & Past President, RMA Toronto. Co-author, RMA x OSFI operational resilience guidance. Senior Advisor & MENA Lead, EDM Association.

"We understand the risk committee because I already chair one."

The raise is a sales plan with dates.

The seed gate is named in advance.

SEED GATE

3 lighthouse pilots passing held-out fidelity evaluation + \$500k contracted. When validations convert to \$250k pilots, the seed prices itself.

THE ASK

\$1M pre-seed SAFE.

The raise and the first revenue stage are the same number: 20 validations × \$50k.

GOVERNANCE + AUDIT INFRASTRUCTURE

SOURCE CONNECTORS + EVALUATION DATASET

PRIVATE VPC / ON-PREM / AIR-GAPPED

FOUNDER-LED GTM: TORONTO + MENA

WisdomTwin preserves institutional judgment. Every employee, backed by a Wisdom Twin.
