WisdomTwin

AI Judgment Twins for regulated enterprises

WisdomTwin, Inc. | Delaware C corporation | Toronto

The problem

The credit exception is ready on Tuesday. The approver is free on Thursday. The committee meets next month. The facts are searchable in seconds, but decisions wait for judgment held in senior calendars.

The product

WisdomTwin builds an AI Judgment Twin for a critical role: its thresholds, exceptions and escalation rules. Authorized evidence enters with source permissions. Answers carry citations, policy gates and safe decline. A named human releases every decision.

Where we are

We have a working product and are pre-revenue: recorded huddles, decision episodes with citations, human validation, a held-out fidelity evaluation framework and five synthetic industry scenarios.

Client outcome

We used our own twin to win a government RFP for Talent Lab. Talent Lab's CEO said on our podcast that the win generated USD $5.5M in revenue for her company in 2025. This is a client outcome on the record, not WisdomTwin product revenue.

The pilot

Design target: 40% fewer internal meetings for the workflows in scope, measured against the buyer's baseline at a 12-week checkpoint inside the six-month Structured Pilot. This is a target, not a measured result or guarantee. Remedy and contract terms remain pending Roman and counsel.

Business model

Concept Validation: USD $50,000 for 2 months and 10 roles. Structured Pilot: USD $250,000 for 6 months and 50 roles. Commercial: USD $500,000+ annually for 500 roles. These are stage prices, not evidence of sales.

Market model

USD $6 to 9B serviceable market. Internal bottom-up model, not a third-party estimate: 20,000 to 30,000 qualifying firms with 10+ executive roles, at about USD $300K annually per firm as a blended average across ladder stages. Inputs are internal assumptions.

Team

Roman Bodnarchuk, Co-Founder and CEO: 28 years turning executive judgment into systems; built the current product. Stella Cabrera, Co-Founder, Governance and Institutional Trust: 20+ years with banks, fintechs and regulators; full-time on close of the pre-seed.

The ask

Raising USD $1,000,000 pre-seed on a post-money SAFE. Intended use: governance and audit, connectors and evaluation, private deployment, pilot delivery and founder-led go-to-market. SAFE terms confirmed with counsel on request.
