AI JUDGMENT TWINS™ FOR REGULATED ENTERPRISES

WisdomTwin™

Your best judgment. Available when the decision can't wait™.

Pilot design target: 40% fewer internal meetings for the decisions in scope, with a named human still signing every decision.

Pre-seed · USD $1M post-money SAFE

THE PROBLEM: JUDGMENT LATENCY

The decision is ready. The person is not.

Tuesday

The credit exception is ready.

Thursday

The person who can approve it is free.

Next month

The committee meets.

The facts are searchable in seconds. The judgment lives in a few senior people's calendars, and regulated teams cannot paste the work into a public chatbot. So the meeting stays the decision engine.

USD $80K

per employee a year spent on meetings

USD $25K

of it on meetings employees say they could skip

USD $100M+

a year in unnecessary meetings at companies of 5,000+

AI made answers instant. Enterprises still make decisions at calendar speed.

Source: Otter.ai with Prof. Steven Rogelberg, UNC Charlotte, 2022. Published research, not WisdomTwin results.

© 2026 WisdomTwin, Inc.

WHERE IT HURTS MOST

The tax is highest where judgment lives: at the top.

300,000

hours a year consumed by one weekly executive committee meeting at one large company. About 150 people's working year.

2x+

VP and C-suite meeting load more than doubles as companies scale. Individual contributors' barely moves.

1.1 years

average Gen Z tenure early in a career, while 10,000 Americans turn 65 every day. Judgment leaves at both ends.

Meetings are how companies move judgment between people. That is why they multiply as a company grows.

Sources: Bain & Company 2014; Fellow, State of Meetings 2024; Randstad 2025; SSA and Pew Research Center.

© 2026 WisdomTwin, Inc.

THE DIVIDEND IS DOCUMENTED

Fewer meetings make better companies. Judgment keeps them on the calendar.

+71%
employee-rated productivity where meetings were cut by 40%

+52%
employee satisfaction at the same 40% cut

−57%
risk of stress when meetings were cut by 60%

Companies cannot cancel the meetings where decisions get made, because the judgment sits in people's heads. **WisdomTwin™ makes that judgment available without the meeting: cited, permissioned and signed off by a named human.**

Laker et al., HBR 2022, 76 companies. Published research, not WisdomTwin results.

© 2026 WisdomTwin, Inc.

WHY THE USUAL FIXES STALL

Every fix so far moves the document. None moves the judgment.

Copilots and search

They find the policy in seconds. They do not find the reason the threshold was set.

Cancelling meetings

Moves the delay, not the decision. The question still waits for the same person.

Delegation memos

The org chart says the decision moved down. The calendar says it did not.

Succession

When an expert retires, the successor inherits the documents, not the judgment.

A regulated firm can cancel a meeting only once the judgment is present without it.

The companies in the Laker study could cancel meetings. A bank needs the judgment first.

© 2026 WisdomTwin, Inc.

MISSION

Make a role's judgment available when the decision is ready, not when the calendar allows.

An executive's judgment is limited by the hours they can attend and the context they can hold at once. A Wisdom Twin gives each critical role governed access to that role's authorized decision history, cited and permissioned, with a named human releasing every decision.

Context

Role history

Authorized decisions, retrieved with citations.

Coverage

Off-calendar

Availability measured in each pilot.

Rhythm

Same-day aim

A morning question, a governed answer, with human sign-off.

Design targets, not measured pilot results.

CATEGORY

Asynchronous management, for the first time as a practical operating model.

01 Skype proved video calls. Zoom removed the friction and owned the category.

02 Email, docs and voice memos tried async leadership. No judgment layer, no governance.

03 WisdomTwin makes it real: one press replaces links, invites and calendar lag.

We do not promise zero meetings. We make the meetings that exist only to move judgment optional.

"The Zoom for management" describes the category only. No affiliation with Zoom.

WHY NOW

The category is funded. We are built around the role and the decision record.

Category proof

Viven

USD $35M seed, October 2025, led by Khosla Ventures.

Category proof

Twin1

USD $20M seed, August 2026, co-led by Bessemer, Tribeca Venture Partners and Aramco Ventures.

Our wedge

Built around the role

One role's thresholds and escalation rules, the decision record as the unit of work, deterministic controls outside the model, and a named human who releases every decision.

Models now reason over long, role-specific evidence. Private and on-premises inference is now practical for many enterprises. WisdomTwin is designed around citations, source permissions, human sign-off and audit, the controls a risk committee already expects.

Category validated. Wedge differentiated. Product built. Commercial proof next.

Sources: Viven 2025-10-15 and Twin1 2026-08-20 funding announcements, verified 2026-08-28.

PRODUCT

One press. Cited answers. Full audit.

01 · Speed

One-Press Huddle™

Press once for a live audio huddle with your management team, day or night. No links, no calendar lag. Recorded and transcribed.

02 · Judgment

Wisdom Twin™

Role-specific judgment, not a cloned person. Trained on 10 to 20 years of a role's authorized evidence: principles, exceptions, thresholds, escalation rules.

03 · Control

Trust Layer™

Cited evidence, source permissions, named human validation, confidence decomposition, safe decline, audit logs and human override.

See it: the 2:54 demo film at wisdomtwin.ai/demo. Synthetic scenario, labeled as such.

LIVE DEMO · TALK TO IT NOW

Meet Roman's Digital Twin. Live on our site.

- Real-time video conversation on a public page. Scan the code or click Talk live.
- Answers only from WisdomTwin's approved knowledge base, inside guardrails.
- Says it is AI on every call, and hands off to the real Roman for a meeting.
- Same pattern as a customer's Wisdom Twin™: authorized evidence in, governed answers out.

HOW IT WORKS

Ingest, Twin, Operate™. Evidence becomes judgment, under human control.

Step 1

Ingest

Authorized evidence only: emails, meetings, docs, SOPs, filings. Immutable evidence objects with source-level permissions.

Step 2

Twin

Decision episodes rebuilt: why, not just what. The role is the unit. Nothing is authoritative until a named human signs off.

Step 3

Operate

One-press huddles and async reviews with cited answers, policy gates and safe decline. Every action audited.

Decision → Audit → Smarter Twin. Every governed decision compounds.

Designed for private cloud, VPC, on-premises or air-gapped deployment, validated in pilot scoping. Model-agnostic.

THE DEMO

Before: waiting to convene. After: a governed judgment.

BEFORE

AFTER

Synthetic demo scenario. AI-generated.
WisdomTwin.ai, the Judgment Platform for regulated enterprises.

BUYER

Regulated enterprises need speed, but cannot trade away control.

They must preserve provenance, permissions, policy context, auditability and named accountability. Public copilots cannot clear a risk committee on those terms.

Banking & capital markets · **Insurance** · **Healthcare & pharma administration** · **Legal & compliance** · **Government** · **Crown corporations**

The Trust Layer™ makes speed deployable.

Private cloud · On-premises · Air-gapped · Model-agnostic

Governed speed must be provable to a risk committee.

© 2026 WisdomTwin, Inc.

MOAT

Each validated decision adds to the role's record.

01

Decision Episode Schema™

Structured record of real decisions: evidence, policy version, context, outcome. Easy to copy, hard to populate.

02

Role Wisdom Graph™

Principles, exceptions, conflicting precedents and escalation paths. Captures why, and compounds per customer.

03

Judgment Policy Engine™

Deterministic precedence, permissions, confidence thresholds and safe decline. Rules applied outside the model, tested in each pilot.

04

Judgment Evaluation Dataset

Held-out scenarios with expert labels, built with each customer. The asset that proves fidelity.

The interface can be copied in a quarter. Years of validated role judgment cannot.

MARKET

Market sizing starts with qualified enterprise buyers

Commercial pricing input

USD $500K+

Proposed annual entry price. Buyer counts and adoption assumptions require validation before a serviceable-market estimate is published.

Problem size, not market size

USD $100M+

a year spent on unnecessary meetings at companies with more than 5,000 employees. That is the cost a buyer is already carrying.

Beachhead: Toronto's banks, insurers, pensions and crown corporations, founder-led. **Expansion:** MENA via Dubai, sovereign and air-gapped by default.

Pain: Otter.ai and Prof. Steven Rogelberg, 2022. Market size remains under validation.

BUSINESS MODEL

One price per stage. One unit: the role.

Stage	Investment	Term	Roles
Judgment Assessment	USD $0	Entry scoping	n/a
Concept Validation	USD $50,000	2 months	10
Structured Pilot	USD $250,000	6 months	50
Commercial	USD $500,000+ per year	Annual	500

Beyond included roles: USD $5,000 one-time setup plus USD $500 per month per role. No tokens, no meters, no per-question billing.

The raise and the first revenue stage are the same number: 20 Concept Validations at USD $50,000.

© 2026 WisdomTwin, Inc.

WHERE WE ARE

Working product. Pre-revenue. A clear next milestone.

What exists today

- Multi-speaker audio huddles, recorded and transcribed
- Evidence timelines and decision episodes with citations
- Human validation, confidence decomposition, policy denial, safe decline
- Held-out evaluation framework for judgment fidelity
- Five founder-built industry scenarios, synthetic and labeled

Client outcome

We used our own twin to win a government RFP for Talent Lab. Talent Lab's CEO said on our podcast that the win generated USD $5.5M in revenue for her company in 2025. This is a client outcome on the record, not WisdomTwin product revenue.

Next: lighthouse pilots

One organization, one critical role, one authorized evidence set, a named success gate. Land one role, prove fidelity, expand.

© 2026 WisdomTwin, Inc.

PILOT COMMITMENT

A 40% meeting target, measured against the buyer’s own baseline.

Weeks 1 to 2

Baseline

Count internal meetings and meeting hours for the roles in scope. Survey employee-rated productivity and satisfaction.

Weeks 3 to 12

Operate

WisdomTwin runs on recurring decision workflows. A named human signs every decision.

Week 12

Measure

Compare against baseline. Report decision records, exceptions and limitations with the change.

A 12-week checkpoint inside the six-month Structured Pilot, for the first 10 regulated-industry pilots.

Target missed: a capped pilot-fee credit. Terms set with counsel.

Design target, not a result. Remedy and contract terms pending counsel.

TEAM

Builder and compliance architect. Two halves of the same problem.

Roman Bodnarchuk

Co-Founder & CEO

Toronto · full-time, writes the code

- 28 years turning executive judgment into systems
- Founded N5R in 1998; Procter & Gamble's digital agency of record for six years
- Clients include P&G (21 brands), Apple, Microsoft, General Motors, Hershey's, Abbott Labs, Marriott/Ritz-Carlton and Four Seasons, across 15 countries
- Built the current WisdomTwin product end to end

SC

Stella Cabrera

Co-Founder, Governance & Institutional Trust

Dubai · full-time on close of the pre-seed

- 20+ years with banks, fintechs and regulators
- Chairman and Past President, RMA Toronto; co-author, RMA x OSFI operational resilience guidance
- Senior Advisor and MENA Lead, EDM Association (700+ firms, 30,000 data professionals)

"We understand the risk committee because I already chair one."

Toronto and Dubai: 24/7 coverage. We run asynchronous management before we sell it.

THE ASK

Raising USD $1,000,000 pre-seed on a post-money SAFE.

Governance and audit
Controls, explainability and audit infrastructure

Connectors and evaluation
Source connectors with permissions; evaluation dataset

Private deployment
VPC, on-premises and air-gapped profiles

Forward-deployed engineering
Lighthouse pilot delivery

Founder-led go-to-market
Toronto and MENA

USD $400K hardware and software
Nvidia Blackwell, Dell XPS Linux laptops, Mac Studios

USD $1M funds roughly 18 months of founder-led runway and the path to 15 to 20 Concept Validations, converting to Structured Pilots and the first Commercial cohort.

SAFE terms confirmed on request with counsel.

© 2026 WisdomTwin, Inc.

18-MONTH PLAN

A sales plan with dates. The seed gate is named in advance.

M0

Close

SAFE closes. Stella moves to full-time. Governance hardening and source connectors begin.

M1 to 3

First validations

Evaluation dataset and customer-hosted profiles ship. First 5 Concept Validations signed in Toronto.

M4 to 9

Scale validations

15 to 20 Concept Validations. Lighthouse pilots run against named success gates.

M10 to 18

Convert

Validations convert to Structured Pilots and the first Commercial cohort. MENA opens via Dubai.

Seed gate: 15 to 20 validations signed, lighthouse pilots passing held-out fidelity evaluation, first commercial conversions.
